Worked on 6 Projects
in Last 24 Months

I enjoy creating user-centric, delightful, and human experiences.

I have 2.3+ years of experience as Product / UX /UI Designer.

I have worked on web applications ,mobile application , Android apps and game UI.

I have designed more than 6 projects.

Highly Self-motivated and goal-oriented professional committed to pursuing a long-term career in UI/UX Design field.

Apart from providing design solutions and development, I've experience in gathering inputs from the client, scoping and estimating the deliverables, assigning the task to the development team and keeping track of the deliverables and communicating it to clients at regular intervals, Furthermore, actively involved in the development cycle.

Handling multiple projects, while interacting directly with clients/stakeholders and engineering team for websites, portals, UI Designs, Branding, Collaterals, and Newsletters and delivering them on different platforms like Web, Outlook and Etc...

Committed to elevating customer satisfaction and achieving business objectives through innovative, data-driven design solutions.

Strong ability to translate complex business goals into seamless User experim

Expertise in usr research, wireframing, prototyping, and iterative design workflows

Proficient in creating and evolving scalable design systems for consistent brand experience across multiple products.

Passionate about staying up to date with emerging tools, UX Patterns, and best practices in the digital design landscape.
