Technical Skills

Languages : JavaScript (ES6+), TypeScript, HTML/HTML5, CSS/CSS3
Frameworks/Libraries : React.js, Next.js, Redux (Redux Toolkit), Node.js, Express.js
Styling : Tailwind CSS, CSS Modules, Material-UI, Bootstrap, Responsive Web Design
Backend & Databases : RESTful APIs, GraphQL, MongoDB, PostgreSQL, MySQL, Mongoose
Testing : Jest, React Testing Library, Unit Testing, Integration Testing
Tools & Practices : Git, GitHub, Postman, Swagger, Vite, npm, CI/CD, Agile Development
Core Concepts : Web Performance Optimization, Cross-Browser Compatibility, User Experience (UX)
Mobile Development : React Native, Native Android/iOS
Cloud Services : AWS (EC2, S3), Firebase, Docker (Basic)

Work Experience [3.5+ years]

Tekisky Private Limited
React.JS Developer

Jan 2022 - Present

Tekisky Pvt Ltd is a technology-driven company specializing in web and mobile application development. The company focuses on delivering scalable, high-performance, and user-centric digital solutions using modern web technologies such as React.js, Node.js, and AI-powered solutions. With a strong commitment to innovation, Tekisky collaborates closely with businesses to enhance operational efficiency and customer engagement. The company follows Agile methodologies to ensure fast, efficient, and high-quality project delivery.

Tech Weavers System
Frontend Developer

April 2021 - Dec 2021

Tech Weaver Systems is a technology-driven company specializing in cutting-edge web and mobile application development. During my 10-month internship, I gained hands-on experience in frontend development, working extensively with React.js, JavaScript, and modern UI frameworks. I contributed to building scalable, high-performance, and user-centric applications, collaborating closely with cross-functional teams. My internship experience significantly strengthened my technical expertise, problem solving skills, and understanding of best practices in frontend development.

Projects

1] BESPASalon and Spa Management App | *React.JS, TypeScript, HTML, CSS, NextJS, ReactNative, Redux.*

Project Description : | The Bespa application is part of the Beauty and Wellness domain, focusing on CRM (Customer Relationship Management) and business operations. It helps salons and spas manage customer relationships, schedule appointments, handle staff, and showcase the service.

Role and Responsibilities :

- Contributed to the design and development of the Bespa application, a salon and spa management system.
- Focused on creating user-friendly and intuitive interfaces for features like Appointment Scheduling, Service Catalog, and Staff Management.
- Developed responsive and efficient frontend components using React.js, ensuring seamless cross-platform functionality.
- Integrated RESTful APIs for smooth communication between the frontend and backend systems.
- Implemented robust client-side validation to ensure accurate appointment booking and service management.
- Optimized UI/UX designs to enhance customer engagement and streamline business operations for salon and spa owners.
- Collaborated with the QA team to identify and fix UI bugs, improving application stability and user experience.
- Developed and optimized Next.js pages for SEO-friendly, high-performance web application.
- Worked on the React Native version of the application, ensuring seamless synchronization with the web platform for cross-platform consistency.

2] AMS AeroFuel Management System App | *React.JS, TypeScript, HTML, CSS, Material-UI, Redux, Node.js.*

Project Description : | The AFM Airlines Fuel Management Application is designed for the aviation industry, focusing on fuel tracking and optimization. It streamlines fuel management operations, ensuring accurate tracking, cost efficiency, and seamless backend integration.

Role and Responsibilities :

- Developed a real-time fuel tracking dashboard for efficient airline fuel monitoring and implemented data visualization using charts and graphs for better analytics.
- Integrated role-based access control to enhance security and user permissions, ensuring data protection and secure access control mechanisms.
- Collaborated with backend developers to ensure seamless API integration and data flow, optimizing request handling and improving overall system performance.
- Conducted rigorous testing and debugging to enhance application stability and performance.
- Optimized UI performance for handling large-scale airline fuel data efficiently.
- Designed a customizable alert system to notify stakeholders of critical fuel usage and anomalies in real time.
- Developed backend APIs using Node.js and Express to process real-time fuel data efficiently.

3] Rental Property Management App | *React.JS, JavaScript, HTML, CSS, Material-UI, Bootstrap, Redux, Jest.*

Project Description : | The Rental Property Management Project is a web application designed to simplify the process of managing rental properties. It provides a platform where property managers can keep track of their properties, tenants and other related information. The application aims to streamline the rental management process, reduce manual paperwork, and improve overall efficiency.

Role and Responsibilities :

- Developed and maintained responsive user interfaces, integrated backend APIs for efficient data flow, and utilized Material UI to create user-friendly components.
- Collaborated with backend developers and designers, implemented responsive design principles, and enhanced application performance by optimizing the web app.
- Implemented accessibility best practices to improve user experience.
- Ensured cross-browser compatibility for seamless application performance.
- Optimized frontend code to enhance load speed and efficiency.
- Worked closely with UX/UI designers to refine user experience.

Education

SRTM University, Nanded, MH

Bachelor of Science [June 2022]

CGPA: 8.6 / 10.0

Final Grade : A+

H.J.P.Jr College Of Science , Nanded, MH

HSC – 12th

R.B.V.H High School, Nanded, MH

SSC – 10th
