## PROJECTS

### UBank Connect

- **Technologies:** React.js | Node.js | MySQL | Express.js
- **Status:** Completed (100%)
- UBank Connect is an innovative solution designed for businesses to effortlessly manage payments, payouts, and transactions, ensuring seamless operations regardless of customer location.
- Our platform provides a **100% secure online payment gateway**, prioritizing the safety and protection of both business and customer data. [GitHub](#)

### Attendance Management System

- **Technologies:** React.js | Node.js | MySQL | Express.js
- **Status:** Completed (100%)
- This system automates and streamlines the attendance tracking process, offering a user-friendly interface that simplifies recording and managing attendance for organizations of all sizes. [GitHub](#)

### E-commerce Admin Panel

- Developed a feature-rich **Admin Panel** for managing an e-commerce platform, enabling **Add / Edit / Delete** operations for **products, categories, subcategories**, and more.
- Integrated secure authentication and role-based access control for admin users.
- Implemented dynamic form handling, image uploads, and real-time updates for efficient content management.
