

STUTI KUMARI

SOFTWARE ENGINEER

📍 Bengaluru, IN ✉ stutisingh200110@gmail.com ☎ +918340454932 🔗 [linkedin.com/in/stuti-kumari-038455245](https://www.linkedin.com/in/stuti-kumari-038455245)

PROFILE

I am a **software engineer** specializing in **front-end development** with **React.js**. I also have experience working with languages like Javascript, Python & C++ and have hands-on experience with **SQL databases**.

EDUCATION

Bachelor of Technology - Computer Science & Engineering (GPA - 8.4/10)

July 2019 – 2023 | Jamshedpur, IN

Arka Jain University

EXPERIENCE

Web Developer & Robotics Trainee

April 2024 – present | Bengaluru, IN

Robomonthan Pvt. Ltd.

- Designed and developed responsive websites, ensuring optimal **user experience** across devices.
- Created and customized themes and plugins using **HTML**, **CSS**, and **JavaScript** to develop dynamic, interactive web pages.
- Managed version control using Git and collaborated on projects using **GitHub**. Integrated third-party APIs to enhance website functionality.
- Debugged front-end, optimized WordPress site performance for faster load times, and collaborated with designers and developers to deliver high-quality solutions within deadlines.

Full stack Developer

August 2024 – November 2024 | Remote

Calanjyam Consultancies and Technologies

- Worked on developing a comprehensive bookkeeping application** that streamlines financial management, utilizing **HTML**, **CSS**, **JavaScript**, and **PHP** to create a responsive user interface and robust backend functionality for managing income and expenses.
- Implemented dynamic data visualization and user authentication** features, including **real-time updates**, **pagination**, and **filtering** options, enhancing user experience and ensuring secure access to sensitive financial information.

PROJECTS

AI-Squad 🔗

Developed a responsive and visually rich website for an AI-focused company using React.js, HTML, CSS, and JavaScript. Built complex UI components from scratch and ensured seamless functionality across all screen sizes.

- Integrated modern design principles to enhance user experience and interface appeal
- Deployed the site using **Vercel** for fast and scalable hosting
- Utilized **Git** and **GitHub** for version control and project management

I-Notebook: A todo App

A app to add you task, delete it and can also update the task

- The application allows users to perform basic **task management** functions, including **adding**, **deleting**, and **updating tasks**. This provides users with a simple and effective way to organize their daily activities.
- Built using modern **web technologies** like **React**, **JavaScript**, **HTML**, and **CSS**. React's component-based architecture facilitates efficient UI updates and **state management**, while **JavaScript** handles **dynamic interactions**.

SKILLS

Object Oriented Programming, Data Structure & Algorithm, Operating System, MS Office tools, MS Excel

Programming Language: C++, Javascript, Python

Web technoogy & Framework: HTML, CSS, ReactJS

Deployment & Version Control: GitHub, Vercel

Databases: MySQL

CERTIFICATES & ACHIEVEMENT

Solved 200+ Problems in Leetcode.

Algorithmic Toolbox by UCSanDiego

React Development Bootcamp By Angela Yu

HTML, CSS Certification Course
