- **Component-Based Architecture**

FUNCTIONAL EXPERTISE DEMONSTRATED

DREAMCARE DEVELOPERS

September 2023 – Present

A mobile and web development firm with ~100 employees offering full-stack solutions in Flutter, iOS, Android, and web platforms, serving startups and enterprises across India and globally.

Software Developer

Serves as the firm's front-end developer across multiple client-facing web platforms, leading UI development from concept to delivery. Supports cross-functional teams in building scalable, privacy-centric and healthcare-focused applications using Angular, React and modern web technologies.

- **Angular Web Applications:** Led front-end for HIPAA-compliant SPAs using Angular 13, TypeScript and Angular Material across HomeHosp and YourXray platforms, ensuring scalability and accessibility.
- **React.js Frontend Development:** Built intuitive React 17 interfaces for 4 client projects including Finuva and Dorado Exchange, enabling responsive, cross-platform user experiences in fintech and e-commerce.
- **Component-Based Architecture:** Engineered modular UIs with component-based Angular design systems for YourXray and HomeHosp, optimizing code reuse and delivery velocity.
- **Responsive UI Engineering:** Delivered adaptive UI layouts compliant with accessibility and HIPAA standards, enabling seamless interaction across patient portals and data-heavy dashboards.
- **HTML CSS JavaScript Mastery:** Developed cross-browser UIs for healthcare and fintech clients using HTML5, SCSS and modern ES6+ JavaScript, ensuring fast load times and accessibility compliance.
- **REST API Integration:** Integrated RESTful APIs to power dynamic content for patient-facing modules in HomeHosp, supporting secure real-time updates and clinical workflows.

EDUCATION

Bachelor of Commerce. [Delhi University](#) (Delhi,India)
