Career Objective

To obtain a challenging and responsible position with an organization that offers, professional growth while being resourceful and flexible with opportunities that will develop and actively utilize my acquired skills and abilities and can add value to the organization. Results oriented professional with good communications, team building, analysis and problem-solving skills and client relationship management.

Profile Summary

Results-driven Frontend Developer with 2+ years of work experience in both web and mobile application development. Proficient in creating responsive, user-centric interfaces using HTML, CSS, JavaScript, Bootstrap and modern framework like React.js. Skilled in translating Figma designs into high-quality, scalable code and optimizing performance across various devices.

Skill Sets

- Proficient in writing clean, semantic HTML5 and modern CSS.
- Strong command over JavaScript (ES6+) for dynamic UI development.
- Experienced in building responsive web interfaces with React.js.
- Version control expertise using Git and GitHub.
- Capable of optimizing performance with lazy loading and code splitting.
- Strong debugging and testing skills using Chrome DevTools.
- Understanding of accessibility and cross-browser compatibility standards.
- Comfortable integrating REST APIs using Axios and Fetch.

Professional Experience

SOFTWARE DEVELOPER

SHIVAM MEDISOFT SERVICES PRIVATE LIMITED (MAY 2023 – DEC 2024)

- Collaborated with designers to translate Figma mockups into interactive web pages using HTML, CSS, JavaScript and Bootstrap.
- Designed and implemented responsive user interface using React.js, improving user engagement for healthcare applications.
- Integrated REST APIs with frontend and handled data rendering and state management.
- Tested API responses and UI components using Postman, Thunder Client, and browser dev tools.
- Managed version control using Git and handled deployment pipelines.
- Analysis of User Stories of each new requirements, create project planning documents, create new feature documents, sending final DOD to lead and manager.
- Performed multiple Unit test cases prepared by the testing team.
- Outside my daily work I have contributed to creating a Shivam Medisoft official website where Candidate can apply the posted jobs. Clients and candidates can post their queries.
