Professional Summary

Passionate and result-oriented Full Stack Developer specializing in React.js, Node.js, and MongoDB. Skilled at building scalable, user-centric web applications with a strong focus on clean code and best practices. Experienced in integrating APIs, securing authentication systems (JWT/OAuth), and collaborating with cross-functional teams. Eager to contribute to challenging projects while continuing to learn and grow.

SKILLS

- Frontend:** React.js, React Native, Redux, jQuery, Bootstrap, Tailwind CSS, Material UI, AJAX, JSON, JSP, RESTful APIs
- Backend:** Node.js, Express.js, Spring Boot, Spring MVC, Liferay
- Databases:** MySQL, SQL, MongoDB
- Languages:** JavaScript, HTML, CSS, JAVA
- Tools & Technologies:** Git, GitHub, Docker, Postman (API Testing), Vercel, Netlify
- Additional Skills:** API Development & Integration, JWT & OAuth Authentication, WebSocket, Payment Gateway Integration, Microservices Architecture

EDUCATION

- Master of Computer Application** | Gujarat Technological University **CGPA: 7.08** | (Aug '23 – May '25)
- Bachelor of Computer Application** | Gujarat Technological University **CGPA: 7.50** | (Oct '20 – Aug '23)

EXPERIENCE

React JS Developer | SNM TECHCRAFT

(Jan '24 – Feb '25)

- Designed and developed interactive user interfaces using React.js, JavaScript, HTML, and CSS, driving seamless user experiences and ensuring cross-browser compatibility.
- Integrated RESTful APIs with Java/Spring Boot backend systems to optimize data flow and enhance front-end functionality.
- Conducted code reviews and assisted team members in optimizing code for performance and readability.
- Collaborated closely with backend and QA teams to identify and resolve issues effectively.

React JS Developer | Munif Enterprise Consulting

(July '23 – Dec '23)

- Built and optimized React.js applications, enhancing UI responsiveness and overall performance.
- Collaborated with backend developers to integrate Java/Spring Boot APIs, ensuring efficient and scalable data communication.
- Implemented reusable components and modern CSS frameworks to streamline development workflows.
- Conducted thorough testing and debugging, improving software quality and user experience.
- Maintained clear documentation of application features and technical specifications.

PROJECTS

Service Booking System (React.js, Node.js, MongoDB, Material UI)

- Developed a full-stack booking application allowing user registration, login, and appointment scheduling.
- Implemented dynamic time-slot functionalities and responsive UI components using React Router DOM.

- Created secure REST APIs with Node.js and Express.js, integrated with MongoDB.
- Built an admin dashboard with comprehensive CRUD functionalities for efficient management of bookings, employees, customers, and feedback.
- Integrated calendar view for booking management and user-friendly appointment scheduling.

Neon Beast – Custom Neon E-commerce Website (React.js, JavaScript)

- Developed a dynamic e-commerce platform for customized neon signs, allowing users to personalize their products.
- Built interactive UI components for real-time style customization, including colors, fonts, and layouts.
- Implemented comprehensive reporting features for managing orders, tracking inventory, and analyzing sales data.
- Integrated payment gateways for secure and seamless transaction processing.
- Delivered an enhanced, user-centric shopping experience through intuitive design and immediate visual feedback.

Nico Web Admin Dashboard (React.js, React Router DOM)

- Designed and implemented a dynamic admin dashboard for managing employees, customers, journals, inquiries, users, and roles.
- Integrated comprehensive CRUD operations across all modules.
- Ensured intuitive navigation and optimized UI/UX for superior usability.
- Developed responsive user interface to enhance cross-device compatibility.

Auction Reports (React.js)

- Developed a comprehensive auction reporting system enabling users to track and analyze auction activities.
- Created components to display detailed information on bids, bidder activity, and overall auction statistics.
- Integrated dynamic, real-time data visualization to reflect live updates on auction progress.
- Optimized user experience with responsive and intuitive UI design, providing clear, easy-to-navigate dashboards.

Marketplace Web Application (React.js)

- Front-end development of a responsive and user-friendly marketplace platform.
- Integrated secure payment gateways to facilitate smooth and reliable transactions.
- Developed dynamic reporting functionalities, allowing real-time generation of sales and revenue reports.
- Enhanced customer experience through performance optimization and intuitive navigation.
