Ankit Naresh Thakur

Full Stack Developer

PROFESSIONAL SUMMARY

Accomplished developer with experience in designing, developing, and maintaining projects. Skilled in managing code quality, bug fixes, and testing. Proficient in collaboration, decision-making, and data structures. Eager to grow in a challenging organization.

PORTFOLIO : <https://portfoliodev1.netlify.app>

TECH STACK/SKILLS

Frontend: React,Next.js, JavaScript, HTML, Typescript, Redux, GatsbyJS, Redux-Thunk, CSS, Bootstrap, Material-UI, Tailwind CSS.
Mobile App Development: React Native (Android), Expo
Backend: Node, Nest.Js, Express, SQL, MongoDB, Mongoose, Redis, GraphQL, WebSockets, GenAI
DevOps & CI/CD: GitHub Actions, Docker
CMS: Drupal, Wordpress, Shopify, Strapi
Tools: Git, GitHub, AWS, Jira, Postman, Heroku, Render, Cyclic, Adobe XD, Figma
System Design & Architecture: HLD & LLD, Microservices, Scalable Systems, Database Design, Optimization, Caching, Load Balancing.

PROFESSIONAL EXPERIENCE

Full Stack Developer | The IT Ocean

Jan 2022 – Present

Responsibilities:

I Led the full lifecycle development of enterprise-grade platforms including **Sonesta Hotels** (Web + Mobile), **Canadian Hospital Specialties** (CHS), **Travel With a Cause** (TWAC), and **Dabodu AI** (Automotive CRM) leveraging React.js, Node.js, and MongoDB. Architected scalable microservices, crafted responsive cross-platform UIs, implemented secure JWT-based auth, real-time features via Socket.IO, third-party integrations (Twilio, Firebase, SendGrid), and optimized API/database performance. Delivered clean, modular codebases with CI/CD workflows, Agile methodology, and production-grade deployment across AWS and GitHub Actions.

Full Stack Web Development Training | Masai School

June 2021 – Jan 2022

I create seamless experiences with React & Redux and build scalable APIs using Node, Express, and MongoDB. Proficient in data structures and algorithms, I specialize in debugging, performance tuning, and system optimization.

PROJECTS

SONESTA HOTEL

-
- Sonesta Hotel is a comprehensive hotel booking website designed to provide users with a seamless experience in finding and reserving accommodations.

Features:

- Frontend Development: Created user-friendly pages for the hotel listing, hotel rooms, and hotel information, ensuring an intuitive and seamless user experience.
- Dynamic Features: Integrated Google Maps to display hotel locations, providing users with an interactive experience to explore nearby attractions.
- API Integration: Developed a comprehensive hotel listing platform for Sonesta Hotel, integrating APIs for dynamic hotel information.
- Filtering Options: Implemented robust filtering capabilities by price, distance, amenities, and brands, enabling users to efficiently search for their ideal accommodations.
- Backend Management: Managed backend operations using Drupal to effectively handle content and APIs, facilitating efficient data management and integration.
- Collaboration: Worked closely with cross-functional teams to ensure alignment on project goals and deliverables, contributing to enhanced overall platform functionality
- Tech Stack: React | GatsbyJS | Apigee API | CSS | Bootstrap | GraphQL | MongoDB | NodeJS | Drupal.

Canadian Hospital Specialties

-
- A modern, responsive web platform developed for Canadian Hospital Specialties Ltd. (CHS) to showcase their portfolio of hospital specialty products and support B2B communication with healthcare providers, hospitals, and distributors across Canada and international markets.

Features:

- Built a responsive, cross-browser compatible frontend using React.js, Bootstrap, and CSS tailored for the medical supplies industry.
- Developed dynamic product listing pages showcasing categories like respiratory care, infusion therapy, and infection control with filtering and categorization.
- Built inquiry forms for product requests and partnerships with validation and API integration.

Travel with a Cause

-
- A TWAC Membership & Events Platform – A web platform for managing memberships, reservations, and event bookings for an exclusive professional club.

Features:

- Built reusable components (Navbar, Forms, Cards, Modals) for consistent UI/UX across the site.
- Added form validations using React Hook Form and custom validation rules.
- Implemented lazy loading and code splitting to improve page load time.
- Used React Router for protected and dynamic route navigation.
- Wrote clean, scalable, and maintainable code following ESLint standards and best practices.
- Participated in weekly sprint meetings and provided input on UI/UX improvements and bug fixes.

DABADU AI

-
- Dabadu AI is a platform that helps car dealerships sell cars faster and more efficiently.

Features:

- Developed and managed both frontend and backend solutions for Dabadu Ai, a platform designed to accelerate car sales for dealerships. Built RESTful APIs specifically for lender management, lead management, and warranty management, enabling centralized tracking of customer interactions across multiple channels. Designed user-friendly interfaces using Bootstrap and SCSS, implementing complete frontend solutions for these key pages. Leveraged Node.js, Express, and MongoDB to create a seamless, integrated experience that supports dealership sales teams in improving operational efficiency and customer management.
- Tech Stack: React | CSS | SCSS | Bootstrap | NodeJS | MongoDB
