Postman, Git, GitHub, GitLab, SonarQube (Bug & Duplication Fixes)

### Architecture:

Scalable Web Applications, Maintainable Component Structure, Nested Routing in React

### UI/UX Practices:

User-Centered Design, Feedback Form Design, Form and Progress Bar Development

## Experience

---

### Rabbit and Tortoise Technology Solutions

January 2023 – May 2025

UI Developer

- Designed and developed enterprise-level applications using **HTML, CSS, JavaScript, jQuery, Bootstrap, and ReactJs.**
- Utilized Bootstrap to create responsive web applications.
- Resolved **sonar** bugs and duplications to ensure smooth application performance.
- Managed project deployment using Maven **Apache Tomcat**.
- Identified and resolved bugs, vulnerabilities, and issues.
- Collaborated with teams to deliver high-quality code and solutions.

## Projects

---

### Onboarding Portal | Ajax, datepicker, jquery, datatable

Jan 2023

- Developed an onboarding process portal for organizations, featuring Eclipse **JSP pages**.
- Designed and implemented the following modules:
  - \* Requisition: Created a requisition form for managers to initiate the hiring process.
  - \* Job Title and Description: Developed a module to manage job titles and descriptions.
  - \* Job Seeker Profile: Designed a profile management system for job seekers.
  - \* Schedule Interview: Implemented a scheduling system for interviews.
  - \* Final Selection and Joining Process: Created a module to manage the final selection and joining process.
  - \* Feedback Form: Designed and developed a feedback form for interviewers to provide feedback on candidates, including rating systems and comment sections.

- Created a comprehensive Human Resource Management System, handling onboarding to offboarding processes.
- Developed user-friendly modules like leave and timesheet management with nested routing and security validations.
- Contributed to the development of a Human Resource Management portal, including shift management, leave management, onboarding, and other HR processes.
- Key responsibilities included **Designing, API integration, form validation**, and creating a progress bar.

**Leave Management System** | *Ajax, datepicker, jquery, datatable*

Jan 2024

- Designed a portal for maintaining employee leave details.
- Implemented the following features:
  - \* Apply Leave: Developed a submodule for employees to apply for leaves, including date picker functionality.
  - \* Sandwich Policy Validations: Added frontend validations to ensure adherence to the organization's sandwich policy.
  - \* Leave History: Created a module to display employee leave history.

**Education****Yashwantrao Chavan Institute of Science, Satara**

July 2016 – June 2019

*Bachelor of Science in Statistics*

Satara
