## EXPERIENCE

### Left Right Mind, Pune — Angular Developer

August 2022- PRESENT

- Led Angular-based UI development for enterprise-grade apps, reducing page load time by 25%.
- Designed reusable, dynamic UI components with search, sort, and filter features, improving user productivity.
- Integrated dynamic RESTful APIs and ensured seamless real-time data updates (30% faster sync).
- Conducted code reviews and implemented best practices, resulting in a 98% bug-free deployment.
- Mentored Freshers developers and collaborated with backend and QA teams across Agile sprints

## SKILLS

- Angular (v14–18), Angular Material, Syncfusion
- JavaScript, TypeScript, HTML, CSS, SCSS
- RESTful API Integration, OpenAI/LLM APIs
- UI/UX Development, Responsive Design
- Agile/Scrum Methodology, Jira, Mantis
- Git, GitHub, GitLab, VS Code, Postman
- Performance Optimization, Cross-functional Leadership
- Data Filtering, Sorting, Pagination
- Node.js, Python (for integration support)

## EDUCATION

### Bachelor of Computer Applications (BCA)

Solapur University, Solapur | June 2017 – May 2020

## LANGUAGES

1. English
2. Hindi
3. Marathi
4. Telugu

## PROJECTS

### Riddell — Web Admin Portal - Frontend Developer

Technology: Angular 17 , Syncfusion,Angular Material ,RESTful API

- **Led** the development of features for user management, 3D model visualization, and dynamic action-based dialog components.
- **Enabled** real-time notifications and history logs to enhance data tracking and decision-making.
- **Optimized** helmet customization workflows,

### **TRAQ Workflow - Frontend Developer**

Technology : Angular 16, TypeScript, RESTful APIs ,Java API'S,Syncfusion, RxJS,python ,node version 20

- **Contributed** to UI bug fixes and enhancements using Syncfusion components, ensuring a seamless user experience.
- **Developed** admin screens for user management and history tracking, streamlining role assignment processes.
- **Implemented** record management features like processing, updating, and automation, reducing operational delays by 10%.

### **NASA Science Discovery Engine — QA Engineer**

Technology: Mantis

- **Tested** UI components to ensure accessibility compliance and usability.
- Performed UI validation & accessibility testing; contributed to 95% platform stability.
- **Identified** and reported bugs, contributing to a 95% platform stability improvement.

### **Augmented AIQ – AI-Powered Document Search Platform – Frontend Angular Developer**

Technology : Angular 19, TypeScript, RESTful APIs, OpenAI/LLM integration (via backend), Angular Material, RxJS,python ,node version22.

- Developed responsive UI for querying and summarizing documents using natural language.
- Integrated with backend LLM APIs to send user queries and receive AI-generated responses, including document matches and summaries.
- Designed modular components for real-time results, filters, and pagination.
- Collaborated with ML/backend teams for smooth API integration.
