GitHub: <https://github.com/pranavsolanki-new>

## PROFESSIONAL SUMMARY

Frontend Developer with approx 5 years of experience in building scalable, dynamic, and enterprise-grade applications using Angular (6-16). Proficient in Micro Frontend Architecture, Okta Authentication, Angular Libraries, and UI component design. Recently architected and delivered a full-scale **Enterprise Project Management System (EPMS)** demonstrating advanced Angular concepts, modular design, and real-time notification systems.

## EXPERIENCE

### Career Break

### Full-time Civil Services Exam Preparation

May 2024 – May 2025 India

### Software Engineer

#### Aureus Tech Systems

October 2021 – May 2024 India

### Software Engineer

#### MothersonSumi Infotech Designs Limited

July 2019 – October 2021 Noida, India

### Internship

#### Workholic infocop.

May 2017 – Jun 2017 Indore, India

Python Training in workholic infocop.

## EDUCATION

### Dual Degree (B.Tech + M.Tech) in Computer Science and Engineering

#### National Institute of Technology (NIT), Hamirpur

July 2014 – June 2019 Hamirpur, India

CGPA - 7.4

## ACHIEVEMENTS

- UGC NET Qualified

## EXTRA-CURRICULAR

- Joint Secretary of the Discipline Committee in hostel

## SKILLS

**Frontend Frameworks and Libraries:** Angular6+, RxJS, Angular CDK, Chart.js , Angular Material, Bootstrap

**Micro Frontend:** : Module Federation, Shared Libraries, Independent Deployment

**Programming Languages:** TypeScript, JavaScript, HTML5, CSS3, C, C++

**Developer Tools:** Git, GitHub, Jira, Postman, VS Code, Angular CLI

## PROJECTS

### Enterprise Project Management System (Individual Project)

- Developed a modular, scalable Angular 16 application with role-based access (Admin, Project Manager, Developer).
- Integrated real-time Notifications, Dashboard KPIs, Project Management, User Management and Drag and Drop Task Management.
- Applied advanced Angular concepts: Lazy-loading, Interceptors, RxJS Services, Reusable Components, Route Guards, and used Chart.Js, Angular CDK, Angular material , and JSON server .
- Delivered a GitHub-hosted, fully documented project with screenshots and a detailed README.  
<https://github.com/pranavsolanki-new/EPMS>

### Claims and Litigation Dashboard

- Developed Claims Dashboard Module for claims data management, implementing CRUD operations, dynamic forms and data grid

### Angular Library Creation.

- Packaged Angular Modules into reusable libraries for integration across multiple enterprise applications

### Okta Authentication in Angular.

- Integrated Okta Auth libraries with routing, protected routes, and user management workflows

### Angular MicroFrontEnd Architetecure.

- Designed Shell app architecture, enabling dynamic module federation and lazy loading

### Claims Team Configuration

- Developed Claims Team Configuration module with functionalities to manage teams, categorize members under Claim Handler, add/edit users, search teams and identify conflict users.

### Intelligent data acquisition and control system

- Worked on Intelligent Data Acquisition and Control System (IDACS) — an automotive industry product with 24+ Angular modules. Developed modules like MES, Inventory, Organisation, and Enabler including UI components, REST API integration, and custom services.

### Fusion Chart Control.

- Developed a reusable shared control for integrating line, bar, 2D, 3D charts in Angular.
