CAREER OBJECTIVE

Junior Software Developer with 2+ years of experience in software development, seeking a challenging React developer roles and contribute my expertise. Eager to collaborate with innovative teams to deliver high-quality solutions and continuously grow my skills in modern environment.

EDUCATION

Bachelor of Technology, JNTUH College of Engineering **2018 - 2022**
Manthani Mechanical Engineering. - 67 Percent

Intermediate, Narayana Junior College - 96 Percent **2016 - 2018**

SSC, Swamy Vivekananda High School - 9.3 CGPA **2015 - 2016**

SKILLS

Technologies	React js, Next js, Express js, Redux Tool Kit, Kafka, Node js, Javascript, Typescript
Styling	Tailwind CSS, Bootstrap, Material UI, Material Tailwind.
Database	MongoDB, MySQL
Version Control	Git, GitHub

EXPERIENCE

Junior Software Developer May 2023 - Present
Satra Services and Solutions - Hyderabad ,India

- Developed and maintained full-stack web applications using React.js, Next.js, and Express.js, enhancing performance and scalability across projects. Implemented Redux Toolkit for efficient state management, reducing code complexity and improving data flow in large-scale applications.

- Actively involved in the ABHA integration initiative(M1, M2 and M3), a national healthcare scheme focused on improving interoperability and access to health data. Leveraged TypeScript and JavaScript to write clean, maintainable code, ensuring type safety and reducing runtime errors

- Built reusable React components, handled repetitive tasks using javascript which improves the code performance, and managed state using Redux for seamless user experiences.

- Designed and implemented a real-time hospital dashboard using Kafka event streaming to ensure seamless data synchronization. Integrated Kafka with the database to dynamically update visual graphs upon new patient registrations,encounter, radiology procedures etc.., enabling instant and accurate insights for healthcare analytics.

- Designed and implemented a hospital billing module to streamline patient transactions, including automated invoice generation, receipt printing, and payment tracking. Ensured accuracy in billing calculations and seamless integration with hospital management systems.

- Used Git and GitHub for version control and collaboration, implementing feature branches and pull request workflows for streamlined team development. Participated in Agile development cycles, attending daily stand-ups, sprint planning, and code reviews to deliver high-quality features on time.

STRENGTHS

- Problem solving and logical thinking.

- Strong debugging skills.

- Adapt fast and learn mentality.
