Git & Github

Communication Skill

Listening Skill

Adaptability

Teamwork

## Summary

Results-driven and detail-oriented **Software Developer** specializing in **Full Stack Web Development** with a strong foundation in **HTML, CSS, JavaScript, React, Express.js, MySQL, MongoDB**, and **Java**. Skilled in building **responsive, user-centric websites and scalable web applications** with modern frameworks and best coding practices. Adept at working across **frontend and backend**, RESTful APIs, and database design. Passionate about delivering clean, maintainable code and continuously learning new technologies.

## Education

**Bachelor of Information Technology**  — Jun 2022 - Jun 2026
Atmiya University, Rajkot

**Higher Secondary School Certificate**  — Jun 2020 - May 2022
The School of Science, Rajkot

**Secondary School Certificate**  — Jun 2019 - May 2020
Sodha School, Jamnagar

## Courses

**Full Stack Web Developer (HTML, CSS, JS, Bootstrapping, PHP with MySQL) Basic**  — Jun 2024
This is summer training course of E & ICT Academy, IIT Kanpur which helped me greatly to understand the concepts of front end web development.

**Programming in Java (NPTEL Certificate)**  — Jul 2024
I did this course to learn more about Java and also to strengthen my basics of Java Programming Language.

**From Learner to Builder: Become an AI Agent Architect (IBM Certificate**  — Jul 2025
I just recently did this course to enhance my knowledge about Artificial Intelligence and now I have basic understanding of AI Agents.

## Projects

- **Netflix Clone Using HTML, CSS & JS**
I had done this project to check my grip on html, css and js and also proved myself that I have learned html, css and js.

- **Computer Science Department Portal**
I had done this project when I had no idea of frameworks, and the technologies used in this project are html, css, js and PHP. This was done to make a replica of education cms portals and also to know how cms works.

- **LunchBox (Mini Project)**
When I had basic understanding of frameworks such as React.js and Express.js, then I did a mini project implementing these technologies to understand how frontend and backend technologies work and intigrate with each other.
