Professional Summary

Front-End Developer with hands-on experience in building scalable, responsive, and high-performance web applications using React.js, Vue.js, HTML, CSS, and Python. Strong knowledge of component-based architecture, API integration, and modern UI/UX principles. Proven ability to deliver robust and maintainable code in agile development environments.

Technical Skills

Frontend: React.js, Vue.js, HTML5, CSS3, JavaScript (ES6).
Backend: Python (Flask/Django basics), REST API integration
Tools & Technologies: Git, VS Code, npm/yarn, Webpack, JSON Server, Chrome DevTools
Other: Responsive Design, Debugging, Agile Methodologies

Professional Experience

Associate Software Engineer | Feb 2022 – Dec 2024 (**Immediate Join**)
Mphasis Pvt Ltd – Chennai, Tamil Nadu

Responsibilities:
- Developed dynamic user interfaces using React.js and Vue.js, ensuring optimal performance and usability.
- Built responsive web pages from scratch using HTML5 and CSS3, adhering to modern accessibility and SEO best practices.
- Integrated RESTful APIs using Axios and Fetch, and managed asynchronous data with use Effect and Vue lifecycle hooks.
- Created reusable components and maintained consistent UI with component libraries (like Material UI / Bootstrap).
- Implemented state management using React Hooks (use State, use Context) and Vue reactive APIs.
- Built form components with custom validation logic using Formik/Yup and Vue's form bindings.
- Collaborated with backend developers to integrate Python-based APIs and troubleshoot cross-functional bugs.
- Utilized version control (Git) for efficient code collaboration and deployment across development teams. Participated in daily stand-ups, sprint planning, and code reviews as part of an Agile/Scrum workflow.

Education

Bachelor of Technology in Computer Science
Chadalawada Ramanamma Engineering College – 2021

Projects

❖ ADP (Airline Data Platform) Digital Natives

➢ Involved in the full-fledged development in all phases of the applications.
➢ Using automated tools to extract data from primary and secondary sources, Developing and maintaining databases, data systems – reorganizing data in a readable format.
➢ Filter Data by reviewing reports and performances indicators to identify and correct code problems, writing the clean, maintainable and efficient code by using python.
➢ Identifying the bugs or issues in existing code and find out the root cause and implementing the solution based on issue.
➢ Designed, developed, and maintained Python-based applications in a collaborative team environment.
➢ Having good knowledge tools like Git, GitHub, JIRA, Agile Methodology, Visual Studio Code, MySQL Workbench, postman.

❖ SOCC (Service operation control center)

➢ Built a full-featured product catalog using React, performing CRUD operations via JSON Server.
➢ Implemented form validation, context API, and routing with React Router DOM.
➢ This project involved developing a service application to manage operations or united Airlines.
➢ Creating a SOCC service application for United Airlines, where user can take a view o several   flight management operations- and add or update the light details as per their requirements and in addition to it user can also download the report for the respective operations.
➢ Created a reusable component which are used in all over the applications.
