Quick Learner

Education

Bachelor's in Computer Engineering

Christ university, Rajkot

2023 – Present

Project

Branding – Local Business (Skill Project)

Created a brand identity system for a local business including logo, color palette, typography, and logo mockups using Figma.
- Delivered a consistent, modern logo design.
- Practiced end-to-end design process.

Laundry App – Case Study

Designed a user-friendly mobile app that simplifies the process of booking laundry services.

Tools Used: Figma, FigJam
Process Followed: Full design thinking process (Empathize Define Ideate Prototype Test)

Key Contributions:

• Conducted user interviews to understand the needs of students, tenants, and working professionals.

• Defined task flow, user flow, and created low-, mid-, and high-fidelity wireframes.

• Built a clean and intuitive UI with a focus on ease of use and aesthetic consistency.

• Applied UX laws such as Hick's Law, Fitts's Law, and Gestalt Principles to improve usability.

- Presented insights using visuals like research graphs, persona boards, and flow diagrams.
