WORK EXPERIENCE

Ant Creatives • **Frontend Engineer**   **04/2023 - 05/2025**

- Developed the client onboarding interface for the **Archinza** application, implementing a **dark-themed UI for the initial phase** and a **light-themed UI for the business form**, with **theme state managed via Redux**.
- Built a **unified application** for **Quorit** to manage both **patient and doctor accounts**. Implemented a **polling based PDF download** feature that visualized **wound progress over time** using **ApexCharts**.
- Built a **robust CRM system** for **Digit Money**, enabling improved **customer data management** and **admin efficiency**. Admins could **upload Excel files** to auto-display customer data, **send messages**, **initiate calls**, and use **customizable filters** (like Interakt) for fast and easy customer search.
- Designed and developed the **company website and admin dashboard** for **Indxx**, enhancing both external **brand presence** and internal **workflow management.**
- Created an intuitive **restaurant admin panel** for **Windmill**, streamlining **order management** and **menu control** to improve daily operations.
- Built a centralized **playbook system** and **document upload feature** for **Btr-ai Web**, improving **internal documentation** access and compliance workflows.
- Delivered a **dynamic data dashboard** for **Supersales IQ**, allowing users to add, configure, edit, and manage custom columns and rows. Admins could activate/deactivate fields, and toggle between **Kanban and Grid views** for flexible sales data visualization.

Sharpener • **Frontend Engineer Intern**   **09/2022 - 03/2023**

- Developed a dashboard UI for tracking user analytics with filters and chart components(using Recharts).
- Built a responsive form component with validation and real-time feedback.
- Integrated a REST API to fetch and display user data in tabular format with sorting and pagination.

SKILLS

Programming Languages : JavaScript, Typescript

Frameworks, Tools : React, HTML, CSS, Rest Api, Git, Tailwind, Bootstrap,Redux Toolkit, Rxjs, Context Api, Jest

Technical Skills : Data Structures Algorithms, Low Level Design(LLD), Unit Testing

Soft Skills : Acumen for Business Problems, Problem-Solving Skills, Great Communication Skill, Leadership skills. Ownership, Troubleshoot, Technical Aptitude, Production Issue Management

---

ACADEMIC QUALIFICATION

Bachelor of Technology : Lovely Professional University (CGPA: (8.0 / 10.0))

PROJECTS

Expense Tracker: Built a web-based application that allows users to **track and manage their expenses** efficiently. Users can also **download their expense data** for offline use. Integrated **Firebase Realtime Database** to handle backend data updates and syncing.

E-commerce Website: Developed a functional e-commerce platform where users can **browse products**, **add items to a cart**, and manage their cart dynamically. Implemented **Firebase authentication** for secure login and used **Realtime Database** for storing and syncing user data.
