Mohammad Sajid

Backend Web Developer

sajidsultan312@gmail.com — +91-7374094182

github.com/MohdSajid12 — linkedin.com/in/mohammad-sajid-228346192

Profile Summary

Backend Developer with hands-on experience in designing and developing scalable REST APIs using Node.js, Express.js, and MongoDB. Skilled in integrating third-party services like OpenAI, handling secure authentication (JWT, OAuth), and deploying SaaS applications. Passionate about building production-ready solutions and delivering high-performance backend systems.

Skills

- **Languages/Runtime:** JavaScript (ES6+), Node.js
- **Frameworks & Tools:** Express.js, CodeIgniter 3, JWT, OAuth, Passport.js
- **Databases:** MongoDB, MongoDB Atlas, MySQL (basic)
- **Dev Tools:** Git, GitHub, Postman, Thunder Client
- **Deployment:** Render, Vercel
- **Others:** REST API Design, MVC Architecture, Cloudinary, Third-party API Integration, Mocha (basic unit testing)
- **Frontend (Basic):** React.js, HTML, CSS

Professional Experience

Web Developer — Oppyo Innovation Pvt. Ltd. (Previously Saglus Info Pvt. Ltd.)
June 2023 – Present

- Developed production-ready REST APIs using Node.js and Express for various AI SaaS platforms.
- Built the AI Pixel platform enabling Text-to-Image, Image-to-Image, and Text-to-Video generation using OpenAI and other third-party APIs.
- Contributed to the AI Book Creator, generating complete books from keywords and URLs, with PDF export functionality.
- Integrated API authentication, error handling, file uploads, and optimized request/response handling.

Web Developer Trainee — MyWeblink
July 2022 – Jan 2023

- Learned and implemented basic projects in HTML, CSS, JavaScript, and Node.js.
- Built small backend utilities and APIs during training period.

Projects

Job Portal Platform (MERN Stack)
Live Demo: job-hunt-z2sc.onrender.com

- Designed and built a full-stack job portal using MongoDB, Express, React, Node.js.
- Recruiters can register, create company profiles, and post jobs.
- Implemented student dashboard, real-time application tracking, and resume upload via Cloudinary.
- Developed backend APIs with secure JWT authentication and protected routes.

E-Commerce REST API
Live API: e-commerce-api-8i6n.onrender.com

- Developed complete backend for product management, user authentication (JWT), and cart functionality.

- Used Node.js, Express.js, MongoDB.

- Published a well-documented README for testing via Postman.

GitHub Projects

- **Advanced Authentication System** — Built a complete auth API using Node.js, Express.js, and MongoDB with the following features:
    - User registration and login with JWT token-based authentication
    - Password hashing using bcrypt
    - Forgot password and reset functionality with secure token sent to Gmail using Nodemailer
    - Protected routes and token verification middleware

Education

B.Tech in Computer Science
Modi Institute of Technology, Kota
2018 – 2022
